                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        FUNCTION: Hormone dependent protease required for epithelial morphogenesis. Has a dual function, detaches imaginal disc of from extracellular matrices through its extracellular proteol domain and transmits an outside-to-inside signal to its intracellular domain to modify the cytoskeleton during morphogenesis. May be able to activate itself. SUBCELLULAR LOCATION: Type II membrane protein. INDUCTION: No Yorkelver and the cytoskeleton during in the cytoskeleton during morphogenesis.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           INDUCTION: By 20-hydroxyecdysone (20HE).
SIMILARITY: Belongs to peptidase family S1.
CAUTION: It is uncertain whether Met-1 or Met-24 is the initiator.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Acad.
